Featured Review

3D SexVilla 2 - Everlust

- **Difficulty:** Easy/Moderate (You must answer some trivia to score with the babes)
- **Graphics:** Very good. These models hold up well under close scrutiny.
- **Sound:** Good/Average. Voices are good. Could use more variety and ability to add custom background music.
- **Customization:** 3D dolls can be extensively customized.
- **Action:** Very hardcore
- **Stability:** Some strange clipping with certain model combinations and animations. Great overall.
- **Fetishes:** Many fetishes are explored and there are odd sextoys and other objects to use on the models.
- **Erotica Rating :** Game is a lot like a porn video, so not too subtle. By customizing the models and using your imagination, however, erotic appeal can be high.

The brand-new 3D SexVilla by thriXXX is innovative, professional, and... sexy. That's right, even if 3D women aren't normally your thing, you might be surprised with the appeal of 3D SexVilla 2. If you've checked out the previous version, I have good news: 3D SexVilla 2 is light years beyond 3D SexVilla 1. When you load it up (and you should definitely try it out - see the banner above), you will notice immediately that you are dealing with a different class of software than the competition. The virtual women are gorgeous, the software is slick, and the interface is fun and easy to master.

The basic idea behind 3D SexVilla is to provide you with a 3D virtual environment where you can take anatomically correct 3D models into a number of beautiful and exotic locations ranging from a modest bedroom to a pimped out fetish club, and have virtual sex with them using a male or female 3D model as your avatar. There are lots sexual positions, sex toys, unlimited camera angels and zoom, outfits in which to dress the models, the ability to take and save photos, and much, much more. With 3D SexVilla 2, *Everlust*, you can fulfill your sexual fantasies in the privacy and safety of your own home.

The two fatal flaws of the previous version were that everything was available without any work - no tease, and the game itself was too small in scope - too limited. Think of a shooter where the game starts and you are standing in

front of the final boss with god-mode enabled. Sure you might have fun kicking his ass for a while, but it would get old fast. "Everlust" has solved both of these problems by adding a story mode and SexCoins (a virtual currency you can earn by answering story questions correctly and interactively bringing your lover to climax), which you can use to purchase new models, poses, locations, sex toys, outfits, and customizations for your virtual playthings, both male and female. Storymode adds a level of role-playing that (for me at least) is essential to feel engaged in the virtual action. If you want to role-play, 3D SexVilla 2 is your ticket to paradise.

But what if you just want to see perfect 3D models have carnal relations? No problem, the folks at thriXXX thought of you too. In addition to the Storymode, there are two other modes: Quickmode and Freemode. *Quickmode* allows you to start in a virtual location with your partner already warmed up enough for you to plunge right in, so to speak, and *Freemode* skips the story and lets you take control of every aspect of your virtual fantasy. If you want to earn the maximum SexCoins, however, stick to Storymode for a while, because you get rewarded with SexCoins for the story *and* for pleasing your partner.

Although there is a limit on how many SexCoins you can earn per day, which may frustrate some players, having to wait gives you a sense of accomplishment and advancement when you are able to purchase new content, and it encourages you to take a break to recharge your sexual batteries a little. (That, along with bonus loyalty SexCoins also encourages you too maintain your subscription, and you can't blame them for that.)

For me, the killer aspect of the game is the customization. Have you played *The Sims 2* or *Oblivion* or any of the many online games that enable you to customize your character? Did you enjoy making an avatar that was unique and special to you? If so, you will also enjoy spending some time in the Everlust customization room and tweaking your sex partner (and perhaps your virtual self) until she or he becomes the stuff of your wet dreams. Prefer brunettes, blondes, redheads, or blue-hairs? Asian, European, African, Indian features or anything in between? Huge or small breasts? Shaved or furry nether regions? Tanned or pale skin? Tattoos and piercings? No problem, and the list goes on and on. With the nearly limitless combinations possible, you are only limited by your imagination.

And last but not least, the innovative people at thriXXX have promised regular updates to 3D SexVilla 2. In the first two weeks I was a member, they came out with a huge update that added a new location, outfits, toys, and other lots of new content for your virtual sex romps. If that is any indication of what's in store, I think we are all in for a good time.

There is a lot more to this impressive program that you will enjoy discovering yourself, so grab the free demo, grab whatever else you're inclined to grab, and give it a try!

SCORE: 7.5 out of 10

November/December 2008 SexPack Update - Trick or Treat

It is said that the fear and arousal parts of the brain are close to each other. I don't know if that's true, but download this sexpack update and find out! ThriXXX has released a new update that adds a new location, new outfits, tools, and tatoos for your role-playing fun. Here are the main changes:

New outfits

- Witch: This enchanted moll is able to ride more than just her broom.
- Devil: Damn, this girl is hot.
- Bloody Scientist: Everything else than a slack laboratory rat.
- Skeleton: This costume makes everybody's blood run cold.

New tools

- Skull Sceptre: Be your halloween party's king and please your subordinate with this tool.
- Rod: Use this glowing rod to inspect the women's dark holes.

New tattoos

- The male models can be pleased about new tattoos for their arms, shoulders and neck.

October 2008 SexPack Update - The Space Station

Would you like to score a sci-fi babe or experience the pleasure of zero-gravity sex? ThriXXX has released a new update that adds a new location, new outfits, poses, and a new tool for your role-playing fun. Here are the main changes:

New location

- Space Station: Have fun 'docking' with these space cadets in their outer space base. These girls seem from another planet, and their only mission is to have as much sex as humanly possible. Discipline them as the 'Station Commander' however you want!

New outfits

- Space Outfit: Out of this world spacey latex and harnesses for your interplanetary cosmic space bunnies.
- Body Stockings: Sexy stockings to let these mission specialist strut their stuff.

New tool

- Warp dildo: Warp speed dildo!
- Captain that's all she's got and she ain't got no more!
A cool space age tool Scotty would have been proud to plunge into Uhura!

New poses

- Floating poses: Trip out like your on space cake! Imagine enjoying zero gravity effortless sex with a space case.
- have sex with her from any angle and she'll keep cumming back for more!.

So if you're looking for pleasure that is out of this world, then it is time to explore the Space Station!

August 2008 SexPack Update - Punk's Not Dead but Gothic (Whatever that means!)

Into the goth or punk scene or fantasized about women that are? ThriXXX has released a new update that add new

models, outfits, tatoos, piercings, and poses for your role-playing fun. Here are the main changes:

New models

- Punk Models: Vain and alluring. Wild haircuts and kinky costumes! Time for sexual anarchy! :)
- Gothic Models: Melancholic and sinister but also incredibly sexy. Characteristics: pale skin, eye-catching make-up, and a clothes.

New outfits

- Punk outfits: Punky tights, stockings, shoes, leopard top, leopard bra and panty, pink and spike bracelets for the girls. Punk jacket, pants and boondockers for the guys.
- Gothic outfits: Gothic dress and amulet, fencenet stockings or ripped tights for the girls. Gothic shirt, black jeans and boots for the guys.
- Sexy fishnet and fencenet stockings in three colors: black, white, and pink!

New tattoos

- Flashy: New cool tattoos for the tattoo packages!

New Piercings

- Nipple piercings: The metal pierces the tender tissue of the nipples and provides another sexy ornamental touch to the human body!

New poses

- Single poses: Hot single poses for those moments when you want to be all alone with your favorite model and play erotic games!
- Bondage poses: Tie up a hot package! Kinky bondage poses for your naughtiest girls!

So if you've been itching to take a walk on the wilder side, this new sexpack might be right up your (dark) alley!

February 2008 SexPack Update - The Garage

Ever wanted to be a porn director? ThriXXX has just released a significant new update that add new tools and new options for your personal fantasies. Here are the three main items for what I've seen so far:

You can now record and create your own videos using a "Sequencer" to place actors, outfits, text and more into a scene of your choosing, and then play back the sequence to watch your creation. You can add a third character to the game - male or female - to create threesomes. As of this writing, there aren't a lot of threesome poses available, but I am betting that will be changed soon enough. There are two new voice sets to support threesomes. And finally, there is a new location: The Racing Garage. Start your engines!

The only downside I've seen so far is that loading new scenes takes longer due to the additional resources that the threesomes require.

So if you haven't played 3D SexVilla 2 in a while, or if you've never tried it, now might be the time to click on the banner above and see how far the game has come!

Featured Hint:

How Do I Get More Sexcoins?

What are Loyalty Sexcoins?

As mentioned in the review, the fastest way to get Sexcoins is to play in Storymode. In Storymode you get SexCoins (up to 3,000) for completing the story **and** more Sexcoins (up to an additional 3,000) for bringing your virtual partner to orgasm. *But here's an additional secret:* Just when your cyberbabe is starting to orgasm, decrease your stroking rate to a minimum. If you are lucky, she will have multiple orgasms and you get bonus Sexcoins!

Remember too, as long as you are a subscriber, you get generous amounts of loyalty sex coins. You get 5,000 Sexcoins for the first four days, and then an additional 15,000 Sexcoins for every thirty days thereafter.

Finally, it's important to realize that the calculation and allocation of Sexcoins comes after your bring your partner to orgasm. If you abort or quit the game before then, you get nothing!
